

Project 01

Build Your First Website with AI

Difficulty

Estimated Time

4–8 Hours

Mission

You have just joined a software company.

Your first task is to create your own personal portfolio website.

You may use AI as your development partner.

Objectives

Learn to:

- Use AI effectively
- Plan a project
- Improve prompts
- Build confidence
- Deploy a website

Rules

You may ask AI anything.

But...

Never copy code without understanding it.

Always ask AI to explain.

Reflection

Congratulations!

You have built your first software project using AI.

This is the beginning of your developer journey.
